

Reference: Low Power FM: I am requesting to continue the FM translator services for radio stations such as K-Love Radio Stations. I have been a listener for about 10 years and the service it has provided to my family and myself is irreplaceable. If K-Love would be replaced by an LPFM broadcaster, it would have a great negative impact on my family and the community. I know this because there is a great # of K-Love listeners in my area. So to have LPFM take over the regular FM station where K-Love airs would have a great effect in our community. I support FM translators and the service they provide in my community. I am requesting that these translators continue to service communities nationwide which should be the one of the main focus of the FCC. Thank You
